Greetings,
I am Esteban Márquez D.

Financial Engineer passionate about
Statistics and Machine Learning 📊 ⚙️

▼ About:

Education:

🤖 💬 Esteban lived most of his childhood in Mexico where he studied English 3_h a day for 10_{years} & obtained the **TOEFL** at 14.
Eventually, he graduated from Cervantes Costa Rica ***Math & Physics*** high school.

He was soon enrolled in college for Engineering and during his Bachelor studies he was elected to be an international Financial Engineering student in Seville, Loyola University where he took some of the main courses of its Degree in Economics including *Game Theory & International Economics*. This inspired him to simulate human behavior to prove Game Theory assumptions using digital interviews from exchange students in Spain.
In Dec. 2022 he acquired his 9_{th} *semester* ***Bachelor's degree in Financial Engineering***

He is currently enrolled in courses to help him certificate as an `Azure Data Scientist Associate` & `Tableau Desktop Specialist`.

Work:

Esteban has worked since 2017 as an independent investment advisor for members of TradingClubGdl and InvestorHouseMX among other investment groups and enthusiasts. Consequently, he was the 1_{st} place on a *competition* hosted by the MexDer financial derivatives operator Kualiderivados in 2018.

In 2022 he was part of the Geospatial Analysis engineering team in his college and implemented *Supervised Learning* algorithms for the IIEG to sense remotely the zones of pressure contained in the polygons of Natural Protected Areas using LandSat and Google Earth Engine satellite imagery geospatial data.

Moreover, his thesis involved feature engineering big data CI/CD pipelines with nature language processing over Customs and Foreign Trades on clothes imports for predictive modelling.

Currently, he is working on a project that fetches markets data in real time including most *major Stock Market Indexes* and their respective **components**, in order to **predict** most ***known*** **portfolio optimizations** using **Recurrent Neural Networks** and ***web development UX/UI designs*** for clients according to their investment *objectives / regions*.
